Psychology’s Ghosts
The Crisis in the Profession and the Way Back

“Erudite, illuminating, and engaging, Psychology’s Ghosts provides solutions to key conceptual problems that continue to haunt our field, from the study of happiness to the treatment of mental illness.” —Richard J. McNally, author of What is Mental Illness?

This book is the product of years of thought and a profound concern for the state of contemporary psychology. Jerome Kagan, a theorist and leading researcher, examines popular practices and assumptions held by many psychologists. He uncovers a variety of problems that, troublingly, are largely ignored by investigators and clinicians. Yet solutions are available, Kagan maintains, and his reasoned suggestions point the way to a better understanding of the mind and mental illness.

Available as e-Book 978-0-300-18342-9

An Argument for Mind

“This book possesses the compelling characteristics of [Kagan’s] earlier works: extraordinary breadth, high scholarship, penetrating analysis, thoughtful commentary, and pleasing prose.”—Philip Roman Zelazo, History of Behavioral Science

In this elegantly written book, an eminent psychologist traces the history of the field of psychology during the last fifty years—the period of his own career.

Available as e-Book 978-0-300-12933-5

What Is Emotion?
History, Measures, and Meanings

“The author’s erudition is impressive as is his security in synthesizing the flood of research in recent years as a basis for future investigation. . . . Highly recommended for psychiatrists dealing with and studying affective disorders.”—Journal of Nervous and Mental Disease

A 2007 Top Seller in Psychology as compiled by YBP Library Services; Finalist for the 2007 ForeWord Magazine Book of the Year Award in the Psychology category

Available as e-Book 978-0-300-17787-9

Death
Shelly Kagan

What am I to make of the fact that I am going to die? In this thought-provoking book, philosopher Shelly Kagan confronts myriad questions relating to our mortality and invites readers to reconsider what they think they know about death.

The Open Yale Courses Series
Available as e-Book 978-0-300-18342-9

The Psychology of Science and the Origins of the Scientific Mind
Gregory J. Feist

“Feist’s own work on the personality dimensions of scientists is reflected in the overall emphasis given to the issues of who becomes a scientist and how scientific talent can be identified, nurtured and retained. . . . This short review only touches on the many merits of this rich and diverse book.”—Ryan D. Tweney, American Scientist

This book is the first to integrate and describe in detail the psychology of science, a richly promising new discipline.

Winner of the 2007 William James Book Award, sponsored by the Society for General Psychology (Division 1) of the American Psychological Association

Available as e-Book 978-0-300-13348-6

Simplexity
Simplifying Principles for a Complex World
Alain Berthoz
Translated by Giselle Weiss

In this book, a noted physiologist and neuroscientist introduces the concept of simplexity, the set of solutions living organisms find that enable them to deal with information and situations, while taking into account past experiences and anticipating future ones.

The Brain
Big Bangs, Behaviors, and Beliefs
Rob DeSalle and Ian Tattersall
Illustrated by Patricia J. Wynne

How did the unique and amazing human brain come to be? This delightfully accessible book reconstructs the long and untidy evolutionary history of the brain, drawing on fascinating new findings in neuroscience, paleontology, and other fields.

Cloth 2012 368 pp. 68 b/w illus.

Available as e-Book 978-0-300-18356-6

Thinking in Circles
An Essay on Ring Composition
Mary Douglas

In this controversial book, social anthropologist Mary Douglas argues that many famous antique texts are misunderstood and others have been dismissed because they employ ring composition, a literary style unfamiliar today. She explores ring composition across cultures and examines its function in the Iliad, the Bible’s Book of Numbers, and Tristram Shandy. Natural Reflections
Human Cognition at the Nexus of Science and Religion
Barbara Herrnstein Smith
An eminent scholar offers new ways to understand the relation between science and religion by examining current efforts by scientists to explain religious belief naturalistically and current efforts by theologians to reconcile scientific and religious accounts of nature.
The Terry Lectures Series

What Intelligence Tests Miss
The Psychology of Rational Thought
Keith E. Stanovich
This book argues that rational thought can be distinguished from intelligence, that it is crucial to real-world behavior, and that people can learn to improve their "rationality quotient."
Winner of the 2010 Grawemeyer Award in Education, given by the University of Louisville

New in paper
The Master and His Emissary
The Divided Brain and the Making of the Western World
Iain McGilchrist
"A very remarkable book. . . . McGilchrist, who is both an experienced psychiatrist and a shrewd philosopher, looks at the relation between our two brain-hemispheres in a new light, not just as an interesting neurological problem but as a crucial shaping factor in our culture. . . . splendidly thought-provoking. . . . I couldn’t put it down."
—Mary Midgley, The Guardian (named a Best Book of 2010)

A Portrait of the Brain
Adam Zeman
The brain is at once a physical object, a living organ, and the cradle of the mind. This book introduces the general reader to its complexities through a series of clinical tales that illustrate its workings, level by level, from atom to psyche. Each narrative opens a window onto the experience of the patient, the life of the doctor, and the science that makes sense of the brain.
Selected as a 2008 Best Seller in Medicine by Library Journal
Cloth 2008 256 pp.  16 b/w illus. ISBN 13: 978-0-300-11416-4 $27.50

Consciousness
A User's Guide
Adam Zeman
In this thought-provoking book, neurologist Adam Zeman offers an enlightening view of consciousness seen through the lenses of science and of philosophy.
Becoming
Basic Considerations for a Psychology of Personality
Gordon W. Allport
A distinguished psychologist outlines here the need for a psychology of becoming, of growth and development of personality, one that can best be discovered by looking within ourselves; for it is knowledge of our own uniqueness that supplies the first, and probably the best, hints for acquiring orderly knowledge of others.
The Terry Lectures Series

Exploring Happiness
From Aristotle to Brain Science
Sissela Bok
"It is hard to imagine how anyone else, in fewer than 200 pages of text, could better encompass so much Western thinking about a question so important to the way we live."—Wall Street Journal
Selected as a Choice Outstanding Academic Title for 2011 in the Philosophy category
Available as e-Book 978-0-300-16843-3

Acting White
The Ironic Legacy of Desegregation
Stuart Buck
Stuart Buck argues that desegregation, while beneficial overall, had the unexpected side effect of causing some black children to view doing schoolwork as "acting white." He suggests solutions for making racial identification a positive force in the classroom.
Paper 2011 272 pp. 9 b/w illus.

Available as e-Book 978-0-300-17723-7

Intuition
Its Powers and Perils
David G. Myers

How reliable is our intuition? How much should we depend on gut-level instinct rather than rational analysis when we play the stock market, choose a mate, hire an employee, or assess our own abilities? In this engaging book, David G. Myers shows us that while intuition can provide us with useful—and often amazing—insights, it can also dangerously mislead us.

The Eighteen-Day Running Mate
McGovern, Eagleton, and a Campaign in Crisis
Joshua M. Glasser

“A gripping account of the political earthquake that ensued when Missouri Sen. Thomas Eagleton, the hastily picked and poorly vetted vice-presidential candidate, was forced to disclose a history of hospitalizations for depression and treatments that included electroshock therapy.”—Publishers Weekly

This riveting story of the 1972 election uncovers how vice-presidential candidate Thomas Eagleton’s secrets were revealed, why he withdrew from the race, and how George McGovern’s campaign dealt with the staggering blow.

Cloth 2012 392 pp. 15 b/w illus.
Boyhoods
Rethinking Masculinities
Ken Corbett

“There has never been a book, written from a psychoanalytic perspective, so amused and amusing and subtle about gender. The masculinities described in Boyhoods, and the way Corbett has found to write about the subject, will radically change how we talk about boys growing up.”—Adam Phillips, Psychoanalyst

This groundbreaking reexamination of male development shows masculinity to be more complex and varied than is commonly expected.

Available as e-Book 978-0-300-15494-8

Children of the Gulag
Cathy A. Frierson and Semyon S. Vilensky

This groundbreaking book offers a comprehensive documentary history of children whose parents were identified as enemies of the Soviet regime and arrested, executed, or sent to the Gulag.

The Psychoanalytic Study of the Child
Volume 66
Edited by Robert A. King, M.D., Claudia Lament, Ph.D., Samuel Abrams, M.D., A. Scott Dowling, M.D., and Paul M. Brinich, Ph.D.

The latest volume in the esteemed series features a detailed case discussion of the child analyst at work and clinical contributions concerning failure-to-thrive, encopresis, and poor impulse control. A section is devoted to children affected by medical illness. Other contributions address the use of the computer and internet in child psychoanalysis, childhood masturbation, the impact of nannies, therapeutic considerations in disturbed adolescents, and a description of the Hampstead Clinic at work.

Cloth 2013 352 pp. 7 b/w illus. ISBN 13: 978-0-300-18535-5 $75.00

Our e-Book editions are available from most major e-Book stores, including the Amazon Kindle Store, B&N’s nook store, Google Editions, Kobo, and Sony.
Dr. Dolittle had it wrong, says the author of this fascinating book: animals cannot use language. Linguist Stephen Anderson explains the difference between communication and language and shows that despite sophisticated and intricate communicative abilities in such species as chimpanzees and parrots, these animals do not have the specific cognitive capacities necessary to acquire language.

Winner of the 2004 Professional/Scholarly Publishing Division Annual Award Competition in the Psychology category

Drawing on accounts from India to Africa and California to Tennessee, and on research in neuroscience, psychology, and animal behavior, G. A. Bradshaw explores the minds, emotions, and lives of elephants.

Winner of the Gold Medal for the 2009 Book of the Year Award in Psychology category

In this intriguing book, the authors, two eminent behavioral scientists, probe the mysteries of the animal mind and identify an advanced level of animal behavior.

Awarded the 2005 D.O. Hebb Distinguished Scientific Contributions Award by the American Psychological Association; Winner of the 2006 Distinguished Primatologist Award from the American Society of Primatologists
